

## Solid Biofuel Technology

# PRECER *Services*

PRECER develops technical solutions for small-scale power generation through solid biofuel combustion. The technology is adjustable to generate electricity for as well hybrid vehicles, hybrid boats as smaller power plants. PRECER renders the necessary step towards breaking the need for fossil fuel through passing on to using environmental friendly solid biofuel technology.

Services

### **PRECER Services**

*Counselling, service and education*

PRECER Services offers information and technical support to companies, organisations and private persons in the areas biofuel, hybrid technology and environmental technology.

Autotech

### **Counselling**

*Thoughts of change*

PRECER Services can help you acquire the knowledge you need to choose the right path when making new environmental investments. PRECER analyzes the effect of your present technology on the environment and gives concrete suggestion on improvements, based on your conditions. A cost estimate of the given suggestions is always included.

Transport

### **Technical Support**

*Makes everyday life easier*

PRECER Services offers full service on PRECER's vehicles and stationary power plants. For more information, contact your retailer.

Machines

### **Education**

*From base to advanced*

Information and knowledge are important at the prospect of new investments, to be able to make the right decision on the right basis. PRECER's educations give an overall picture of different energy solutions, looking into every part individually, considering as well environment as cost. The different parts are studied from a lifecycle perspective and include the whole cycle, from raw material to recycling.

Marine

PRECER's educational programme stretches from a global perspective to details, and covers different kinds of fuel. The education gives you knowledge and skill to be able to make the right decision in different energy matters. The educations are always adjusted to suit the customer's specific needs and previous knowledge.

Power Plants
